1. Receipt is acknowledged of amendments filed on 4/22/2004.
2. Claims 18-35 and 38-43 are presented for examination.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

4. Claims 18-35 and 38-43 are allowed.
5. The following is an examiner's statement of reasons for allowance: Although the prior art of record, Langrand et al. (U.S. 5,233,656) teaches means of generating a personal identification number/PIN, which is representative of a secret telephone data, taken alone or in combination with any other references fails to teach a method for generating the personal identification number having N digits from a binary number having L digits so that the personal identification number is randomly distributed over an available number domain and wherein the binary number having L digits is generated at least in-part from data pertaining to an individual. These limitations in conjunction with other limitations in the claimed invention were not shown by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2876

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Perlman et al. (U.S. 4,376,279) discloses personal identification system.

Hsiao (U.S. 5,971,272) teaches secured personal identification number.
